

But not done yet...

using.jl

`--compile-incremental=yes`

using MyPackage

- Base.require(:MyPackage)
- isdefined(Main, :MyPackage) ?
 - Base._include_from_serialized or Base.include
 - Base.cachecompile(:MyPackage)
 - Recursion!
 - MyPackage.__init__()
- symbols are imported from MyPackage

Deployment

Future work in progress.

BuildExecutable.jl and contrib/build_sysimg.jl

```
int main(int argc, char *argv[ ]);
```

Output C code

Bundling incremental compile into application

Installer tarball

```
Project.generate( )
```
